PLANT A TREE

OFFSET OUR **CARBON FOOTPRINT**

Starting this year, **XtremeMac** is partnering up with Saving The Amazon, an **NGO dedicated to the conservation of the Amazon** by planting trees with local indigenous communities.

Through their **Tree Adoption Program**, we aim to strengthen our commitment towards a more sustainable global activity.

<https://savingtheamazon.org/en>

PLANT YOUR TREE IN THE AMAZON

We offer the opportunity to **all of our customers** to be part of this great initiative:

Every order of XtremeMac products will automatically come **with an amount of trees planted** in the Amazon (this amount is proportional to the order size).

Every planted tree will be customized with our customers logo and name!

By planting in the Amazon Rainforest, we are achieving:

- 1 **Preservation** of the most important Tropical Rainforest on the planet and fighting against the Climate Crisis.
- 2 **Support** the indigenous communities by planting trees with them in their own territories, while receiving an income for each planted tree so they can improve their life quality.
- 3 **Connecting** the Amazon Rainforest with the world, bringing the possibility of adopting trees from anywhere on the planet.

Native tree planted by indigenous communities

Photographed and geo-localized

Biodegradable label

HOW DOES IT WORK?

1

Your tree is planted by the indigenous communities of the Amazon.

2

You receive via email:

1. A photograph of your planted tree with its **geolocation coordinates**
2. Digital **donation certificate** accrediting of your participation in this great project.
3. **Digital letter** with information about your tree and the communities that planted it.

3

Follow up your tree for **3 years!**

**JOIN THE JOURNEY AND
BECOME PART OF
OUR PIECE OF FOREST
IN THE AMAZON**
